

Phone-free Schools

Why should we have phone-free schools?

Improved student focus. No distracting notifications.

Better grades. Improved focus leads to improved grades!

Less cheating. It's hard to resist cheating when all the answers are a swipe away..

Ok...but why not just have classroom limits?

Connection and cohesion. Talking to each other more will leading to less loneliness and bullying.

Relationship Skills. Kids need social interaction to learn healthy interpersonal behaviors.

Confidence and Independence. Without the ability to instantly check a device for help or entertainment, they learn to figure things out, ask questions, and seek support from teachers or classmates.
